- Dio, Http, Get connect, Sqflite, MySQL, Shared Preferences, Deep link.
- Java, Kotlin, C++, Python.
- Problem solving, Teamwork, Critical thinking, Working under pressure, Multitasking.

Professional Experience

Implementation Consultant | L2 Support Engineer

Direct Debit System / Dubai, United Arab Emirates

06/2024 – current

- Successfully supported and led end-to-end technical integrations for over 7 important clients in UAE such as Tabby, utilizing strong communication and coordination skills to guide them from sandbox setup through to production launch.
- Achieved approximately 20% increase in company revenue by ensuring timely onboarding and seamless go-lives, enabled by strong communication and client engagement skills.
- Provided Level 2 technical support by actively analyzing operations reported issues, reproducing bugs and validating data via DB/API tools to deliver clear reports to engineering teams—minimizing escalations and speeding up resolution.

Flutter Engineer

Direct Debit System / Dubai, United Arab Emirates

12/2023 - 06/2024

- Maintained the main Customer Mobile App and Merchant Web Dashboard using Flutter, contributing to a 300% increase in app installations.
- Created a new Admin Dashboard for internal operations and monitoring, as well as a dedicated dashboard for integration clients to track their mandates and transactions.
- Enabled the Customer Mobile App to support the web platform by adapting the codebase for multi-platform deployment, enhancing accessibility and user reach.
- Led end-to-end manual testing across UI and API layers for web and mobile apps, ensuring overall system reliability and release readiness.

Flutter Team Lead

Aratech / Dubai, United Arab Emirates

05/2023 – 11/2023

- Making technical decisions.
- Continued working in the development process.
- Post-live software support, new feature development and error monitoring.
- Training new hires in development flow.

Flutter Developer

Aratech / Dubai, United Arab Emirates

11/2021 - 05/2023

- Developed and maintained more than 5 mobile apps as both an individual developer and part of a team in the company.
- Dealt directly with clients from different nationalities, understanding and applying their project needs.
- Provided mentorship for interns to become members of our team.

Junior Flutter Developer

Freelancer

10/2020 - 11/2021

- Created more than two mobile applications as a junior freelance developer.
- Gained knowledge in work and solved problems independently.

Projects

- **Direct Debit – Payer App:** Developed a cross-platform mobile and web app enabling seamless, paperless recurring payments for users, providing an intuitive platform for managing subscriptions, utilities, rent, and more.
- **Direct Debit - Merchant Dashboard:** Built a Flutter Web-based dashboard for merchants to manage direct debit payments, track transactions, and access real-time reporting and analytics.
- **Wave:** Developed an application for personal finance management.
- **Kidopi:** Developed an app that simplifies scheduling for family members activities. [Google Play](#) - [App Store](#).
- **Sanad:** Developed an ERP app to track workflow, sales, and deliveries across departments, providing real-time updates and generating reports to enhance efficiency and minimize errors.
- **Staff Breeze:** Developed an app that allows customers to find and hire personal assistants based on their needs. [Google Play](#) - [App Store](#).
- **Carenal:** Integrated payment methods into the app (ApplePay, Tamara...ets). The app's goal is to improve reservations for beauty centers.

EDUCATION

- **Bachelor’s degree in Computer Engineering** 09/2016 - 08-2022
Tishreen University

Certificates

- [Ararech Certificate of Experience](#)
